

ACCESS SERVICE

5. Access Ordering

5.1 General

This section sets forth the regulations and order related charges for services set forth in other sections of this catalog. Order related charges are in addition to other applicable charges for the services provided.

An Access Order is an order to provide the customer with Switched and Special Access or Access Related Service or to provide changes to existing services.

The regulations, rates and charges for special construction are set forth in Section 8 of this catalog and are in addition to the regulations, rates and charges specified in this section.

A customer may order any number of services of the same type and within the same premises on a single Access Order. All details for services for a particular order must be identical except those for multipoint service.

The customer shall provide to the Telephone Company the order information required in Section 5.2 and in addition the customer must also provide:

- Customer name and premises address(es).
- Billing name and address (when different from customer name and address).
- Customer contact name(s) and telephone number(s) for the following provisioning activities: order negotiation, order confirmation, interactive design, installation and billing.

5.1.2 Expedited Orders

When placing an Access Order, a customer may request a service date that is prior to the applicable service date. A customer may also request an earlier service date on a pending Access Order. In either case, an access order modification as set forth in Section 5.4 of NECA TARIFF F.C.C. NO. 5 is required. If the

Omaha, NE 68114

ACCESS SERVICE

5. Access Ordering (Cont'd.)

5.1 General (Cont'd.)

5.1.2 Expedited Orders

Telephone Company determines that the service can be provided on the requested date and that additional labor cost or extraordinary costs are required to meet the requested service date, the customer will be notified and will be provided with an estimate of the additional charges involved. Charges will be billed at actual cost, not to exceed ten percent over estimated charges. Such additional charges will be determined and billed to the customer as explained following.

To calculate the additional labor charges, the Telephone Company will, upon authorization from the customer to incur the additional labor charges, keep track of the additional labor hours used to meet the request of the customer and will bill the customer at the applicable Additional Labor charges as set forth in 17.4.3(A) following.

To develop, determine and bill the customer the extraordinary costs which may be involved, the Special Construction terms and conditions as set forth in Section 8 of this catalog will be used by the Telephone Company. Authorization to incur the costs and to bill the customer will be according to the terms and conditions of Section 8 of this catalog.

When the request for expediting occurs after the issuance of the Access Order, a Service Date Change Charge, as set forth in 17.4.1(B) following also applies.

5.2 Ordering Requirements

5.2.1 Switched Access Service

(A) Feature Group A

Orders for Feature Group A Switched Access Service shall be placed by line.

Issued: August 20, 1999

Effective: September 1, 1999

ACCESS SERVICE

5. Access Ordering (Cont'd.)

5.2 Ordering Requirements (Cont'd.)

5.2.1 Switched Access Service (Cont'd.)

(A) Feature Group A (Cont'd.)

When placing an order for Feature Group A, the customer shall provide the following information in addition to that set forth in 5.1 preceding:

- The number of lines and the first point of switching (i.e., Dial Tone Office),
- Optional Features,
- If the Off-hook Supervisory Signaling is provided by the customer's equipment before the called party answers, or the Signaling is forwarded by the customer's equipment when the called party answers,
- Lines to be provided as single lines,
- Lines to be arranged in multiline hunt group arrangements,
- Directionality (1-way, 2-way, etc.),
- A projected percentage of PIU as set forth in 2.3.11 preceding,
- The Interexchange Carrier to which the service is connected or, in the alternative, specification of the means by which the FGA access communications are transported within the state.

(B) Feature Group B

Orders for Feature Group B Switched Access Service shall be placed by trunk.

When placing an order for Feature Group B Service, the customer shall provide the following information in addition to that set forth in 5.1 preceding:

- The number of trunks,
- The end office when direct routing is desired,
- The access tandem office when tandem routing is desired,

Issued: August 20, 1999

Effective: September 1, 1999

ACCESS SERVICE

5. Access Ordering (Cont'd.)

5.2 Ordering Requirements (Cont'd.)

5.2.1 Switched Access Service (Cont'd.)

(B) Feature Group B (Cont'd.)

- Optional Features,
- Trunks to be provided as single trunks,
- Trunks to be arranged in trunk group arrangements,
- Directionality (1-way, 2-way, etc.),
- A projected percentage of PIU as set forth in 2.3.11 preceding,
- The Interexchange Carrier to which the service is connected or, in the alternative, specification of the means by which the FGB access communications are transported within the state,
- The access code dialing arrangement (i.e., a uniform access code of 950-XXXX),
- For Feature Group B service to a Mobile Telephone Switching Office (MTSO) directly interconnected to a Telephone Company access tandem office, the customer shall provide information to the Telephone Company indicating the NXX code(s) to be accessed.

5.2.2 Special Access Service

When placing an order for Special Access Service the customer must specify:

- The customer designated premises or hubs involved,
- Type of service (e.g., voice grade, high capacity, etc.),
- The channel interface(s),
- Technical specification package,
- Options desired,
- The traffic carried on the circuit consists of less than ten percent interstate traffic.

For multipoint services, the channel interface at each customer designated premises may, at the request of the customer, be different, but all such

Effective: September 1, 1999

ACCESS SERVICE

5. Access Ordering (Cont'd.)

5.2 Ordering Requirements (Cont'd.)

5.2.2 Special Access Service (Cont'd.)

interfaces shall be compatible.

All part-time Program Audio services are subject to a service inquiry. A service inquiry is a request to the Telephone Company to determine if facilities exist to provide the service ordered and to determine the service date on which service can be provided to the customer.

When ordering bridging and/or multiplexing the customer must specify the Telephone Company hub(s) from which they desire service. The customer must specify only those hubs that provide the type of service ordered and interconnect with the wire center(s) from which the customer requires service. The Wire Center section of NECA TARIFF F.C.C. NO. 4 identifies hub types and multiplexing functions as well as hub levels (i.e., hub, terminus hub, etc.). Additionally, the Subtending section of NECA TARIFF F.C.C. NO. 4 identifies wire centers and the intermediate and/or super-intermediate hubs with which they interconnect.

When ordering Term Discount Rate plans or upgrades to the plans, discontinuance charges, as specified in 7.2.8 of NECA TARIFF F.C.C. NO. 5, will not apply if the conditions set forth therein are met and the customer provides the following ordering information:

Term Discounts/Upgrades in Capacity (DDS to DS1 or DS1 to DS3)

- The customer's order for the disconnect of the existing service and the installation of the new upgraded service must be received simultaneously and specifically reference the application of upgrade in capacity.

Issued: August 20, 1999

Effective: September 1, 1999

Nebraska Independent Telephone Association
c/o TELECOM Consulting Resources, Inc.
909 North 96th Street, Suite 203
Omaha, NE 68114

ACCESS SERVICE

5. Access Ordering (Cont'd.)

5.2 Ordering Requirements (Cont'd.)

5.2.2 Special Access Service (Cont'd.)

- The customer's disconnect order for the existing service must reference the upgraded service installation order.

Customer orders to install and disconnect services provided under a Term Discount plan, where the number of circuits remains constant and the customer wishes to maintain the existing Term Discount period and minimum service period, must be received simultaneously and reference continuation of the existing term discount period and the minimum service period on both the installation and disconnect orders.

DS3 Capacity Discounts/Upgrades

- The customer's order for the disconnect of the current DS3 Capacity Interface and order for the installation of the upgraded DS3 Capacity Interface must be received by the Telephone Company simultaneously and specifically reference the application of upgrade in capacity.
- The customer's disconnect order for the existing DS3 service must reference the installation order.

Omaha, NE 68114

ACCESS SERVICE

6. Switched Access Service (Cont'd.)

6.1 General (Cont'd.)

6.1.3 Rate Categories (Cont'd.)

(A) Local Transport

The Local Transport rate category establishes the charges related to the transmission and tandem switching facilities between the customer designated premises and the end office switch(es) which may be a Remote Switching Module(s) or WATS Serving Office, where the customer's traffic is switched to originate or terminate the customer's communications. Mileage measurement rules are set forth in NECA TARIFF F.C.C. NO. 5, Section 6.4.6 and in this section.

Local Transport is a two-way voice frequency transmission path composed of facilities determined by the Telephone Company. The two-way voice frequency transmission path permits the transport of calls in the originating direction (from the end user end office switch to the customer designated premises) and in the terminating direction (from the customer designated premises to the end office switch), but not simultaneously. The voice frequency transmission path may be comprised of any form or configuration of plant capable of and typically used in the telecommunications industry for the transmission of voice and associated telephone signals within the frequency bandwidth of approximately 300-3000 Hz. The customer must specify the choice of facilities (i.e., Voice Grade 2 or 4 wire or High Capacity DS1 or DS3) to be used in the provision of the Direct Trunked Transport or Entrance Facility.

The customer must specify when ordering (1) whether the service is to be directly routed to an end office switch or through an access tandem switch, (2) the type of Direct Trunked Transport, and whether it will overflow to Tandem Switched Transport when service is directly routed to an end office, (3) the

6.1.3 Rate Categories (Cont'd.)

(A) Local Transport (Cont'd.)

directionality of the service, and (4) when multiplexing is required, the hub(s) at which the multiplexing will be provided.

When the customer has both Tandem Switched Transport and Direct Trunked Transport at the same end office, the customer will be provided Alternate Traffic Routing as set forth in NECA TARIFF F.C.C. NO. 5, Section 6.4.6.

Direct Trunked Transport is available at all tandems and at all end offices except those end offices identified in NECA TARIFF F.C.C. NO. 4. as not having the capability to provide Direct Trunked Transport. Direct Trunked Transport is not available from end offices that lack recording or measurement capability.

Direct Trunked Transport of originating 800 series calls from an end office is available only from certain equipped end offices, identified in NECA TARIFF F.C.C. NO. 4.

Local Transport is provided at the rates and charges set forth in 17.2.2 following. The application of these rates with respect to individual Feature Groups is as set forth in 6.4.1(C) following. When more than one Telephone Company is involved in providing the Switched Access Service, the Local Transport rates are applied as set forth in NECA TARIFF F.C.C. NO. 5, Section 2.4.7.

Issued: August 20, 1999

Effective: September 1, 1999

Nebraska Independent Telephone Association
c/o TELECOM Consulting Resources, Inc.
909 North 96th Street, Suite 203
Omaha, NE 68114

ACCESS SERVICE

6. Switched Access Service (Cont'd.)

6.1 General (Cont'd.)

6.1.3 Rate Categories (Cont'd.)

(A) Local Transport (Cont'd.)

The Local Transport rate category includes four classifications of rate elements: (1) Direct Trunked Transport, (2) Tandem Switched Transport, (3) Transport Interconnection Charge, and (4) Multiplexing.

(1) Direct Trunked Transport

The Direct Trunked Transport rate elements recover a portion of the costs associated with a communications path between a serving wire center and an end office or serving wire center and a tandem on circuits dedicated to the use of a single customer.

Three types of Direct Trunked Transport are available: (1) Voice Grade, 2 or 4-wire, (2) High Capacity DS1, and (3) High Capacity DS3. The minimum period for which a High Capacity DS3 Direct Trunked Transport is provided is twelve months.

High Capacity DS3 Direct Trunked Transport can only be terminated at end offices that are identified as hub offices that provide DS3 to DS1 multiplexing. Additionally, DS1 Direct Trunked Transport can only be terminated at end offices that are

Issued: August 20, 1999

Effective: September 1, 1999

ACCESS SERVICE

6. Switched Access Service (Cont'd.)

6.1 General (Cont'd.)

6.1.3 Rate Categories (Cont'd.)

(A) Local Transport (Cont'd.)

(1) Direct Trunked Transport (Cont'd.)

identified as hub offices that provide DS1 to Voice Grade multiplexing or are electronic end offices. Offices that provide multiplexing are identified in NECA TARIFF F.C.C. NO. 4, WIRE CENTER INFORMATION.

Direct Trunked Transport rates consist of a Direct Trunked Facility rate, specified in 17.2.2 following, which is applied on a per airline mile basis and a Direct Trunked Termination rate which is applied at each end of each measured segment of the Direct Trunked Facility (e.g., at the end office, hub tandem and serving wire center). When the Direct Trunked Facility mileage is zero, neither the Direct Trunked Facility rate nor the Direct Trunked Termination rate will apply.

The Direct Trunked Facility rate recovers a portion of the costs of transmission facilities, including intermediate transmission circuit equipment, between the end points of the interoffice circuits.

The Direct Trunked Termination rate, specified in 17.2.2 following, recovers a portion of the costs of the circuit equipment necessary for the termination of each end of the Direct Trunked Facility.

Issued: August 20, 1999

ACCESS SERVICE

6. Switched Access Service (Cont'd.)

6.1 General (Cont'd.)

6.1.3 Rate Categories (Cont'd.)

(A) Local Transport (Cont'd.)

(2) Tandem Switched Transport

The Tandem Switched Transport rate elements recover a portion of the costs associated with a communications path between a tandem and an end office on circuits that are switched at a tandem switch.

Tandem Switched Transport rates consist of a Tandem Switching rate, a Tandem Switched Facility rate, and a Tandem Switched Termination rate.

Credits will be provided for Tandem Switched Transport charges associated with FGC and FGD service for 888 (or other 800 series) traffic delivered at the tandem from an SSP equipped end office capable of handling 800 traffic on a direct trunked basis but incapable of handling 888 (or other 800 series) traffic on a direct trunked basis. Those SSP equipped end offices that cannot accommodate direct trunking of originating 888 (or other 800 series) traffic are identified in NECA TARIFF F.C.C. NO. 4, WIRE CENTER INFORMATION.

Issued: August 20, 1999

Effective: September 1, 1999

6. Switched Access Service (Cont'd.)

6.1 General (Cont'd.)

6.1.3 Rate Categories (Cont'd.)

(A) Local Transport (Cont'd.)

(2) Tandem Switched Transport (Cont'd.)

- (a) The Tandem Switching rate recovers a portion of the costs of switching traffic through an access tandem. The Tandem Switching rate specified in 17.2.2 following is applied on a per access minute of use (MOU) basis for all originating and terminating MOU switched at the tandem. Tandem locations are specified in NECA TARIFF F.C.C. NO. 4, WIRE CENTER INFORMATION.
- (b) The Tandem Switched Facility rate recovers a portion of the costs of transmission facilities, including intermediate transmission circuit equipment, between the end points of interoffice circuits. The Tandem Switched Facility rate applies on a per access minute per airline mile basis for all originating and terminating MOU routed over the facility, as specified in 17.2.2 following.

Issued: August 20, 1999

Effective: September 1, 1999

ACCESS SERVICE

6. Switched Access Service (Cont'd.)

6.1 General (Cont'd.)

6.1.3 Rate Categories (Cont'd.)

(A) Local Transport (Cont'd.)

(2) Tandem Switched Transport (Cont'd.)

- (c) The Tandem Switched Termination rate recovers a portion of the costs of circuit equipment necessary for the termination of each end of each measured segment of the Tandem Switched Facility. The Tandem Switched Termination rate, as specified in 17.2.2 following, applies on a per access MOU basis (originating and terminating MOU routed over the facility) at each end of each measured segment of Tandem Switched Facility (e.g., at the end office, Feature Group A dial tone office, host office, tandem and serving wire center). When the Tandem Switched Facility mileage is zero, neither the Tandem Switched Facility rate nor the Tandem Switched Termination rate will apply.

Issued: August 20, 1999

Effective: September 1, 1999

ACCESS SERVICE

6. Switched Access Service (Cont'd.)

6.1 General (Cont'd.)

6.1.3 Rate Categories (Cont'd.)

(A) Local Transport (Cont'd.)

(3) Transport Interconnection Charge

The Transport Interconnection Charge recovers the costs associated with Local Transport that are not recovered by the Direct Trunked Transport, Tandem Switched Transport, Multiplexing or dedicated signaling (e.g., SS7) rates. The Transport Interconnection Charge specified in 17.2.2 following applies to both Tandem Switched and Direct Trunked access MOU.

Issued: August 20, 1999

Effective: September 1, 1999

Omaha, NE 68114

ACCESS SERVICE

6. Switched Access Service (Cont'd.)

6.1 General (Cont'd.)

6.1.3 Rate Categories (Cont'd.)

(A) Local Transport (Cont'd.)

(4) Multiplexing

DS3 to DS1 Multiplexing charges specified in 17.2.2 following apply when a High Capacity DS3 Entrance Facility or High Capacity DS3 Direct Trunked Facility is connected with High Capacity DS1 Direct Trunked Transport. The DS3 to DS1 multiplexer will convert a 44.736 Mbps channel to 28 DS1 channels using digital time division multiplexing.

DS1 to Voice Grade Multiplexing charges apply when a High Capacity DS1 Entrance Facility or High Capacity DS1 Direct Trunked Facility is connected with Voice Grade Direct Trunked Transport. However, a DS1 to Voice Grade Multiplexing charge does not apply when a High Capacity DS1 Direct Trunked Transport is terminated at an electronic end office and only Switched Access Service is provided over the DS1 facility (i.e., Voice Grade Special Access channels are not derived). The DS1 to Voice Grade multiplexer will convert a 1.544 Mbps channel to 24 Voice Grade channels.

Multiplexing is available at wire centers identified in NECA TARIFF F.C.C. NO. 4, WIRE CENTER INFORMATION.

(5) Reserved for future use.

6. Switched Access Service (Cont'd.)

6.1 General (Cont'd.)

6.1.3 Rate Categories (Cont'd.)

(A) Local Transport (Cont'd.)

(6) Nonchargeable Optional Features

Where transmission facilities permit, the individual transmission path between the customer's designated premises and the first point of switching may at the option of the customer be provided with the following optional features as set forth and described in 15.1.1(E) of NECA TARIFF F.C.C. NO. 5.

- Supervisory Signaling
- Customer Specified Entry Switch Receive Level
- Customer Specification of Local Transport Termination

When a customer subscribes to Common Channel Signaling Network Connection (CCSNC) Service, the following optional features are made available and are described in 6.10.1 of NECA TARIFF F.C.C. NO. 5.

- SS7 Signaling
- Calling Party Number
- Carrier Selection Parameter
- Charge Number Parameter

(7) Chargeable Optional Features

Common Channel Signaling, Signaling System 7 (CCS/SS7) Network Connection (CCSNC) Service

provides a signaling path between a customer's designated Signaling Point of Interface (SPOI) and a Telephone Company's Signaling Transfer Point (STP). CCSNC is provided as set forth in NECA TARIFF F.C.C. NO. 5, SECTION 6.10.5.

800 Data Base Access Service is provided to all customers in conjunction with FGC and FGD Switched Access Service. A Basic or Vertical Feature Query charge, as set forth in 17.2.2(B) following, is applied for each query launched to the 800 data base. The Basic Query provides the identification of the customer to whom the call will be delivered and includes area of service routing which allows routing of 800 series calls by telephone companies to different interexchange carriers based on the LATA in which the call originates. The Vertical Feature Query provides this same customer identification function in addition to vertical features which may include (1) call validation, ensuring that calls originate from subscribed service areas; (2) POTS translation of 800 series numbers, which is generally necessary for the routing of 800 series calls; (3) alternate POTS translation, which allows subscribers to vary the routing of 800 series calls based on factors such as time of day, place or origination of call, etc.; and (4) multiple carrier routing, which allows subscribers to route to different carriers based on factors similar to those in (3).

Issued: August 20, 1999

ACCESS SERVICE

6. Switched Access Service (Cont'd.)

6.1 General (Cont'd.)

6.1.3 Rate Categories (Cont'd.)

(B) End Office

The End Office rate category establishes the charges related to the local end office switching and end user line termination functions necessary to complete the transmission of Switched Access communications to and from the end users served by the local end office. The End Office rate category includes the Local Switching and Information Surcharge rate elements. Directory Assistance Service is set forth in Section 9 following.

(1) Local Switching

The Local Switching rate element establishes the charges related to the use of end office switching equipment, the terminations in the end office of end user lines, the terminations of calls at Telephone Company Intercept Operators or recordings, the STP costs, and the SS7 signaling function between the end office and the STP.

Local Switching does not apply to FGB and FGD services associated with Wireless Switching Centers (WSCs) directly interconnected to a Telephone Company access tandem office.

ACCESS SERVICE

6. Switched Access Service (Cont'd.)

6.1 General (Cont'd.)

6.1.3 Rate Categories (Cont'd.)

(B) End Office (Cont'd.)

(1) Local Switching (Cont'd.)

Where end offices are appropriately equipped, international dialing may be provided as a capability associated with Local Switching for FGC and FGD services. International dialing provides the capability of switching international calls with service prefix and address codes having more digits than are capable of being switched through a standard FGC or FGD equipped end office.

Rates for Local Switching are set forth in 17.2.3 following. The application of these rates with respect to individual Feature Groups is as set forth in 6.4.1(C) following.

There are four types of functions included in the Local Switching rate element: Common Switching, Transport Termination, Line Termination and Intercept. These functions are described in (a) through (d) following.

(a) Common Switching

Common Switching provides the local end office switching functions associated with the various access (i.e., Feature Group) switching arrangements. The Common Switching arrangements provided for the various Feature Group

(B) End Office (Cont'd.)

(1) Local Switching (Cont'd.)

(a) Common Switching (Cont'd.)

arrangements are described in 6.5 through 6.9 of NECA TARIFF F.C.C. NO. 5. Included as part of Common Switching are various nonchargeable optional features which the customer can order to meet customer specific communications requirements. These optional features are described in Section 6.10.1 of NECA F.C.C. No. 5.

(b) Transport Termination

Transport Termination functions provide for the line or trunk side arrangements which terminate the Local Transport facilities. Various nonchargeable optional termination arrangements, described in 6.10.2 of NECA TARIFF F.C.C. NO. 5, are included in Transport Termination.

The Telephone Company will determine the number of Transport Terminations provided as set forth in 6.2.5 of NECA TARIFF F.C.C. NO. 5.

(c) Line Termination

Line termination provides for the terminations of end user lines in the local end office. There are two types of Line Terminations, i.e., Common Line Terminations and Special Access Service Terminations, used in the provision of WATS or WATS-type services at Telephone Company designated WATS Serving Offices.

6.1 General (Cont'd.)

6.1.3 Rate Categories (Cont'd.)

(B) End Office (Cont'd.)

(1) Local Switching (Cont'd.)

(c) Line Termination (Cont'd.)

Special Access Service Terminations are differentiated by line side versus trunk side terminations. In addition, there are various types of originating and terminating line side terminations, depending on the type of Special Access Service signaling. Line side terminations are available with either dial pulse or dual tone multifrequency address signaling.

(d) Intercept

The Intercept function provides for the termination of a call at a Telephone Company Intercept operator or recording. The operator or recording tells a caller why a call, as dialed, could not be completed, and if possible, provides the correct number.

(2) Information Surcharge

Information Surcharge rates are assessed to a customer based on the total number of access minutes. Rates for Information Surcharge are as set forth in 17.2.3(B) following. The application of these rates with respect to individual Feature Groups is as set forth in 6.4.1(C) following.

The Information Surcharge does not apply to FGB and FGD Switched Access Services associated with Wireless Switching

Centers (WSCs) directly interconnected to a Telephone Company access tandem office.

The number of end office switching transmission paths will be determined as set forth in 6.2.5 of NECA TARIFF F.C.C. NO. 5.

(C) Chargeable Optional Features

Where facilities permit, the Telephone Company will provide chargeable optional features, at the request of the customer, as outlined in NECA TARIFF F.C.C. NO. 5, Section 6.1.3(C).

6.4 Rate Regulations

This section contains the specific regulations governing the rates and charges which apply for Switched Access Service.

6.4.1 Description and Application of Rates and Charges

Two types of rates and charges apply to Switched Access Service: recurring (usage and flat rates) and nonrecurring charges. These rates and charges are applied to the various rate elements as set forth in (C) following.

(A) Recurring Rates

(1) Usage rates for Switched Access Service are rates which apply on a per access minute or per call basis. These charges are accumulated over a monthly period.

(2) Flat rates for Switched Access Service are rates which apply on a per rate element basis per month.

6.4 Rate Regulations (Cont'd.)

6.4.1 Description and Application of Rates and Charges
(Cont'd.)

(B) Nonrecurring Charges (Cont'd.)

(1) Installation of Service

For Direct Trunked Transport ordered to the end office, a Local Transport nonrecurring trunk activation charge, as set forth in 17.2.1(E) following, will be applied at the end office on a per order basis for each group of 24 Direct Trunked Transport trunks or fraction thereof that is activated at the end office.

For Direct Trunked Transport ordered to the access tandem a Local Transport nonrecurring trunk activation charge, as set forth in 17.2.1(E) following, will be applied at the access tandem on a per order basis for each group of 24 Direct Trunked Transport trunks or fraction thereof that is activated at the access tandem.

For Tandem Switched Transport, a Local Transport nonrecurring trunk activation charge, as set forth in 17.2.1(E) following, will be applied at the access tandem on a per order basis for each group of 24 dedicated trunks or fraction thereof that is activated at the access tandem.

A maximum of 24 trunks can be activated on a DS1 facility and a maximum of 672 trunks can be activated on a DS3 facility.

Issued: August 20, 1999

Effective: September 1, 1999

6. Switched Access Service (Cont'd.)

6.4 Rate Regulations (Cont'd.)

6.4.1 Description and Application of Rates and Charges
(Cont'd.)

(B) Nonrecurring Charges (Cont'd.)

(2) Interim NXX Translation Optional Feature

This nonrecurring charge applies to the initial order for the installation of the Interim NXX Translation optional feature with FGC or FGD service and for each subsequent order received to add or change NXX translation codes. The charge applies if this optional feature is installed coincident with or at any time subsequent to the installation of Switched Access Services. The charge is applied per order, per LATA or Market Area by the Telephone Company. When multiple telephone companies provide the translation function, the nonrecurring charge is assessed only by the Telephone Company providing the final translation function, which identifies the customer's traffic. This traffic is then delivered to the customer's point of termination without further translation.

(3) Service Rearrangements

All changes to existing services, other than changes involving administrative activities and FGA off-hook supervisory signaling, will be treated as a discontinuance of the existing service and an installation of a new service. The nonrecurring charge described in (1) preceding applies for this work activity. Moves that change the

(B) Nonrecurring Charges (Cont'd.)

(3) Service Rearrangements (Cont'd.)

physical location of the point of termination are described and charged for as set forth in 6.4.4 of NECA TARIFF F.C.C. NO. 5. If due to technical limitations of the Telephone Company, a customer may not combine its Interim NXX traffic with its other trunk side Switched Access Services, no charge applies to combine these trunk groups, when it becomes technically feasible.

Administrative changes, as follows, will be made without charge(s) to the customer:

- Change of customer name,
- Change of customer or customer's end user premises address when the change is not a result of physical relocation of equipment,
- Change in billing data (name, address, contact name or contact telephone number),
- Change of agency authorization,
- Change of customer circuit identification,
- Change of billing account number,
- Change of customer test line number,
- Change of customer or customer's end user contact name or telephone number, and
- Change of jurisdiction.

Other changes made without charge to the customer are as follows:

- Changes/additions to existing Switched Access Services because of Telephone Company initiated network reconfigurations. (The Telephone Company will provide the same grade of service as

Issued: August 20, 1999

Effective: September 1, 1999

ACCESS SERVICE

6.4.1 Description and Application of Rates and Charges
(Cont'd.)

(B) Nonrecurring Charges (Cont'd.)

(3) Service Rearrangements (Cont'd.)

existed prior to reconfiguration.) Charges will apply to those changes/additions in excess of those required to provide the same grade of service and/or capacity. Grade of service will be determined by industry standard engineering tables.

Changes to the point in time when the off-hook supervisory signal is provided in the originating call sequence are subject to the Access Order Charge as set forth in 17.4.1(A) following.

For additions, changes or modifications to an optional feature which has a separate nonrecurring charge, that nonrecurring charge will apply.

Issued: August 20, 1999

Effective: September 1, 1999

ACCESS SERVICE

6. Switched Access Service (Cont'd.)

6.4 Rate Regulations (Cont'd.)

6.4.1 Description and Application of Rates and Charges
(Cont'd.)

(B) Nonrecurring Charges (Cont'd.)

(3) Service Rearrangements (Cont'd.)

For additions, changes or modifications to optional features which do not have their own specific nonrecurring charges, an Access Order Charge, as set forth in 17.4.1(A) following will apply, with the exception of the addition of 64 Clear Channel Capability to an existing service. When an optional feature is not required on each transmission path, but rather for an entire transmission path group, an end office or an access tandem switch, only one such charge will apply.

When the 64 Clear Channel Capability optional feature is installed on an existing facility, the addition will be treated as a discontinuance and start of service and all associated non-recurring charges will apply.

For conversion of FGC and FGD trunks from multifrequency address signaling to SS7 signaling or from SS7 signaling to MF address signaling, nonrecurring charges will apply as set forth in 17.2.1(D).

(C) Application of Rates

The application of these rates is dependent upon the Feature Group, type of transport (e.g. direct trunked, tandem switched, type of multiplexing) and the availability of equal access capabilities in the end office to which the service is provided.

Issued: August 20, 1999

Effective: September 1, 1999

6. Switched Access Service (Cont'd.)

6.4 Rate Regulations (Cont'd.)

6.4.1 Description and Application of Rates and Charges
(Cont'd.)

(C) Application of Rates (Cont'd.)

The following rules provide the basis for application of rates and charges:

Switched Access rates apply to all FGC access minutes provided to customers to furnish MTS/WATS, to all terminating access minutes, to all access minutes originating at end offices equipped with equal access capabilities (i.e., FGD), and to Directory Transport Service. Switched access rates also apply to FGB and FGD access minutes originating or terminating in a Wireless Switching Center (WSC), which is directly connected to a Telephone Company access tandem office. In addition, rates apply to FGA and FGB access minutes used in the provision of MTS/WATS service.

Switched access rates always apply to the following Local Transport rate elements:

- Direct Trunked Facility
- Direct Trunked Termination
- Multiplexing
- Tandem Switched Facility
- Tandem Switched Termination
- Tandem Switching

6.4 Rate Regulations (Cont'd.)

6.4.1 Description and Application of Rates and Charges
(Cont'd.)

(C) Application of Rates (Cont'd.)

(5) Unmeasured FGA and FGB Access Services

Where originating and/or terminating measurement capability does not exist for FGA or FGB services provided to the first point of switching, the number of assumed access minutes are as set forth in 6.5.4 and 6.6.4 respectively of NECA TARIFF F.C.C. NO. 5.

(6) Reserved for future use.

(7) Common Channel Signaling/Signaling System 7
(CCS/SS7) Network Configuration

The CCS/SS7 Network Connection is comprised of a Signaling Mileage Facility charge, a Signaling Mileage Termination charge, a Signaling Entrance Facility charge, and a Signaling Transfer Point (STP) Port charge.

The Signaling Mileage Facility charge is assessed on a per facility per mile basis. The Signaling Mileage Termination charge is assessed on a per termination basis, at each end of the facility. When the Signaling Mileage Facility mileage measurement is zero, Signaling Mileage Termination charges will not apply.

The STP port charge is assessed on a per port basis for each termination of a Signaling Mileage Facility at an STP.

6. Switched Access Service (Cont'd.)

6.4 Rate Regulations (Cont'd.)

6.4.1 Description and Application of Rates and Charges
(Cont'd.)

(C) Application of Rates (Cont'd.)

(8) 800 Data Base Access Service

A basic Query or Vertical Feature Query charge applies for each completed query that is returned from the 800 data base identifying the customer to whom the call is delivered, whether or not the actual call is delivered to the customer. The query is considered completed when the appropriate call routing information is returned to the Service Switching Point (SSP) that launched the query. Charges will be applied only by those companies whose wire centers are identified as assessing query charges in NECA TARIFF F.C.C. NO. 4, WIRE CENTER INFORMATION.

When FGC or FGD service is used for the provision of 800 Data Base Access service and the total minutes of use (MOU) and/or count of queries can be determined for each customer at a tandem or SSP but cannot be determined by individual end office, an allocation method will be utilized to determine MOU and/or queries by end office and customer. For each end office, a ratio will be developed and applied against the total MOU and/or count of queries for a given customer as determined by the SSP or tandem. These ratios will be developed by dividing the unidentified originating 800 series MOU at an end office by the total unidentified originating MOU in all end offices subtending the tandem or SSP.

Effective: September 1, 1999

ACCESS SERVICE

6. Switched Access Service (Cont'd.)

6.9 IntraLATA Dialing Parity Surcharge

The Telephone Company may include a surcharge on all intraLATA originating access minutes subject to presubscription to recover costs associated with the implementation of intraLATA dialing parity, in accordance with its intraLATA dialing parity plan as filed with the Nebraska Public Service Commission (NPSC). The surcharge will recover incremental costs associated with hardware and software upgrades, customer notification, and any other costs approved by the NPSC in the Telephone Company's Dialing Parity Plan.

ACCESS SERVICE

7. Special Access Service

7.1 General

7.1.1 Channel Types

Following is a brief description of each type of channel:

Voice Grade- a channel for the transmission of analog signals within an approximate bandwidth of 300 to 3000 Hz.

Program Audio- a channel for the transmission of audio signals. The nominal frequency bandwidths are from 200 to 3500 Hz, from 100-5000 Hz, from 50-8000 Hz, or from 50-15000 Hz.

Digital Data- a channel for the digital transmission of synchronous serial data at rates of 2.4, 4.8, 9.6, 19.2, 56.0 or 64.0 Kbps.

High Capacity- a channel for the transmission of isochronous serial digital data at rates of 1.544, 3.152, 6.312, 44.736 or 274.176 Mbps.

Detailed descriptions of each of the channel types are provided in 7.4 through 7.11 of NECA TARIFF F.C.C. NO. 5.

The customer also has the option of ordering Voice Grade and High Capacity facilities to Telephone Company hubs for multiplexing to individual channels of a lower capacity or bandwidth. Descriptions of the types of multiplexing available at the hubs, as well as the number of individual channels which may be derived from each type of facility are set forth in 7.6 and 7.10 of NECA TARIFF F.C.C. NO. 5. Additionally, the customer may specify optional features for the individual channels of the facility to further customize the channel to meet specific communications requirements. Optional features and functions are described in 7.2.1 of NECA TARIFF F.C.C. NO. 5.

Issued: August 20, 1999

Effective: September 1, 1999

ACCESS SERVICE

7. Special Access Service (Cont'd.)

7.1 General (Cont'd.)

7.1.2 Service Descriptions

For the purposes of ordering, there are four categories of Special Access Service:

	Service Designator Codes
Voice	VG
Program Audio	AP
Digital Data	DA
High Capacity	HC

Each service consists of a basic channel to which a technical specifications package (customized or predefined), channel interface(s) and, when desired, optional features and functions are added to construct the service desired by the customer. Technical specifications packages and channel interfaces are described in NECA TARIFF F.C.C. NO. 5, Section 15. This information indicates the transmission parameters that are available with each package. Optional features and functions are described in Section 7, NECA TARIFF F.C.C. NO. 5.

Customized technical specifications packages will be provided where technically feasible. If the Telephone Company determines that the requested parameter specifications are not compatible, the customer will be advised and allowed to change the order.

When a customized channel is ordered, the customer will be notified whether Additional Engineering Charges apply. In such cases, the customer will be advised and allowed to change the order.

(A) Channel interfaces at each Point of Termination on a two-point service may be symmetrical or asymmetrical. On a multipoint service they may also be symmetrical or asymmetrical, but communications can only be provided between compatible channel interfaces. Only certain channel interfaces are compatible, as set forth in NECA TARIFF F.C.C. NO. 5, Section 15.

ACCESS SERVICE

7. Special Access Service (Cont'd.)

7.2 Rate Regulations

This section contains the specific regulations governing the rates and charges that apply for Special Access.

7.2.1 Rate Categories

There are three basic rate categories which apply to Special Access Service:

- Channel Terminations, described in 7.2.1(A) following;
- Channel Mileage, described in 7.2.1(B) following;
- and Optional Features and Functions, described in 7.2.1(C) following.

(A) Channel Termination

The Channel Termination rate category recovers the costs associated with the communications path between a customer designated premises (CDP) and the serving wire center (SWC) of that premises. Included as part of the Channel Termination is a standard channel interface arrangement which defines the technical characteristics associated with the type of facilities to which the access service is to be connected at the Point of Termination (POT) and the type of signaling capability, if any. The signaling capability is provided as an optional feature as set forth in (C) following. One Channel Termination charge applies per CDP at which the channel is terminated. This charge will apply even if the CDP and the SWC are collocated in a Telephone Company building. If the CDP is considered by the Telephone Company to be located an extraordinary distance from the SWC, Special Construction charges will apply.

For a Digital Data Service 56.0 or 64.0 Kbps or for a 1.544 Mbps or 44.736 Mbps High Capacity Service connecting a CDP to a Public Packet Data Network Service as described in NECA TARIFF F.C.C. NO. 5, Section 16, there will be a charge for only one Channel Termination.

Issued: August 20, 1999

Effective: September 1, 1999

ACCESS SERVICE

7. Special Access Service (Cont'd.)

7.2 Rate Regulations (Cont'd.)

7.2.1 Rate Categories (Cont'd.)

(A) Channel Termination (Cont'd.)

For DS3 High Capacity Service, the Channel Termination rates are made up of the DS3 Capacity Interface rate and the DS3 Channel Installed rate. The Capacity Interface rate is dependent upon the capacity ordered (i.e., Capacity Interface of 1, 3, 6 or 12) and is applicable at each CDP. The capacity ordered is the maximum number of DS3 services that can be terminated on a given service at the CDP (e.g., a capacity of 3 can terminate 1, 2 or 3 DS3 services). One DS3 Channel Installed rate applies per CDP at which the channel is terminated for each DS3 channel ordered. These charges will apply even if the CDP and the SWC are collocated in a Telephone Company building. If the CDP is considered by the Telephone Company to be located an extraordinary distance from the SWC, Special Construction charges will apply.

Omaha, NE 68114

ACCESS SERVICE

7. Special Access Service (Cont'd.)

7.2 Rate Regulations (Cont'd.)

7.2.1 Rate Categories (Cont'd.)

(B) Channel Mileage

The Channel Mileage rate category recovers the costs associated with the end office equipment and the transmission facilities between the serving wire center (SWC) associated with the customer designated premises (CDP), between a SWC associated with a CDP and a Telephone Company hub, or between two Telephone Company hubs. Channel Mileage rates are comprised of the Channel Mileage Facility rate and the Channel Mileage Termination rate.

(1) Channel Mileage Facility

The Channel Mileage Facility rate recovers the per mile cost for the transmission path which extends between the Telephone Company SWCs and/or hub(s).

(2) Channel Mileage Termination

The Channel Mileage Termination rate recovers the cost for end office equipment associated with terminating the facility (i.e., basic circuit equipment and terminations at SWCs and hubs). The Channel Mileage Termination rate will apply at the SWC(s) for each CDP and Telephone Company hub where the channel is terminated. If the Channel Mileage is between Telephone Company bridging hubs, the Channel Mileage Termination rate will apply per Telephone Company designated hub. If the Channel Mileage is between the SWC for a CDP and a WATS Serving Office, the Channel Mileage Termination rate will apply at both the SWC associated with the CDP and the WATS Serving Office. When the Channel Mileage Facility is zero (i.e., collocated SWCs), neither the Channel Mileage Facility rate nor the Channel Mileage Termination rate will apply.

Issued: August 20, 1999

Effective: September 1, 1999

ACCESS SERVICE

7. Special Access Service (Cont'd.)

7.2 Rate Regulations (Cont'd.)

7.2.1 Rate Categories (Cont'd.)

(C) Optional Features and Functions

The Optional Features and Functions rate category recovers the costs associated with optional features and functions which may be added to a Special Access Service to improve its quality or utility to meet specific communications requirements. These are not necessarily identifiable with specific equipment, but rather represent the end result in terms of performance characteristics which may be obtained. These characteristics may be obtained by using various combinations of equipment. Although the equipment necessary to perform a specified function may be installed at various locations along the path of the service, they will be charged for as a single rate element.

Examples of Optional Features and Functions that are available include, but are not limited to, the following:

- Signaling Capability
- Hubbing Functions
- Conditioning
- Transfer Arrangements

Descriptions for each of the available Optional Features and Functions are set forth in 7.4 through 7.11 of NECA F.C.C. TARIFF NO. 5.

A hub is a Telephone Company designated SWC at which bridging or multiplexing functions are

Effective: September 1, 1999

ACCESS SERVICE

7. Special Access Service (Cont'd.)

7.2 Rate Regulations (Cont'd.)

7.2.1 Rate Categories (Cont'd.)

(C) Optional Features and Functions (Cont'd.)

performed. The bridging functions performed are to connect three or more CDPs in a multipoint arrangement. The multiplexing functions are to channelize analog or digital facilities to individual services requiring a lower capacity or bandwidth.

NECA TARIFF F.C.C. NO. 4 identifies SWCs, hub locations, hub level (i.e., hub, terminus hub, intermediate hub, or super-intermediate hub) and the type of bridging or multiplexing functions available. Additionally, subtending wire centers are identified for intermediate and super-intermediate hubs.

7.2.2 Types of Rates and Charges

There are three types of rates and charges. These are monthly rates, daily rates and nonrecurring charges. The rates and charges are described as follows:

(A) Monthly Rates

Monthly rates are recurring rates that apply each month or fraction thereof that a Special Access Service is provided. For billing purposes, each month is considered to have 30 days.

(B) Daily Rates

Daily rates are recurring rates that apply to each 24 hour period or fraction thereof that a Program Audio Special Access Service is provided for part-time use. For purposes of applying daily rates, the 24 hour period is not limited to a calendar day.

Part-time Program Audio Service provided within

7. Special Access Service (Cont'd.)

7.2 Rate Regulations (Cont'd.)

7.2.2 Types of Rates and Charges (Cont'd.)

(B) Daily Rates (Cont'd.)

a consecutive 30 day period will be charged the daily rate, not to exceed the monthly rate.

(C) Nonrecurring Charges

Nonrecurring charges are one-time charges that apply for specific work activity (i.e., installation or change to an existing service). The types of nonrecurring charges that apply for Special Access Service are installation of service, installation of optional features and functions, and service rearrangements. These charges are in addition to the Access Order Charge, as specified in 17.4.1 following.

(1) Installation of Service

Nonrecurring charges apply to each service installed. The nonrecurring charges for the installation of service are set for each channel type as a nonrecurring charge for the Channel Termination and, in some cases, the Channel Mileage Termination.

(2) Installation of Optional Features and Functions

When optional features and functions are installed coincident with the initial installation of service, no separate nonrecurring charge is applicable. When optional features and functions are installed or changed after the installation of service, an Access Order Charge as specified in 17.4.1 following will apply per order.

Issued: August 20, 1999

Effective: September 1, 1999

7. Special Access Service (Cont'd.)

7.2 Rate Regulations (Cont'd.)

7.2.2 Types of Rates and Charges (Cont'd.)

(C) Nonrecurring Charges (Cont'd.)

(3) Service Rearrangements

Service rearrangements are changes to existing (installed) services. Such service rearrangements may be administrative in nature or may involve an actual physical change to the service. Changes to pending orders are set forth in 5.4 of NECA TARIFF F.C.C. NO. 5.

Changes in the physical location of the point of termination or customer designated premises are moves as set forth in 7.2.3 of NECA TARIFF F.C.C. NO. 5.

Changes in the type of Service or Channel Termination which result in a change of the minimum period requirement will be treated as a discontinuance of the service and an installation of a new service.

Changes in ownership or transfer of responsibility from one customer to another will be treated as a discontinuance of the service and an installation of new service. In the event the change in ownership or transfer of responsibility does not interrupt use of or relocate facilities or arrangements, the change will be treated as an administrative change.

Administrative changes will be made without charge(s) to the customer. Administrative changes are as follows:

- Change of customer name,
- Change of customer or customer's end user premises address when the change of address is not a result of physical relocation of equipment,

(B) Nonrecurring Charges (Cont'd.)

(3) Service Rearrangements (Cont'd.)

- Change in billing data (name, address, or contact name or telephone number),
- Change of agency authorization,
- Change of customer circuit identification,
- Change of billing account number,
- Change of customer test line number,
- Change of customer or customer's end user contact name or telephone number, and
- Change of jurisdiction.

All other service rearrangements will be charged as follows:

- If the change involves the addition of other customer designated premises to an existing service, the nonrecurring charge for the channel termination rate element will apply. The charge(s) will apply only for the location(s) that is being added. The charge(s) will be in addition to an Access Order Charge as set forth in 17.4.1 following.
- If the change involves the addition of an optional feature or function (with the exception of the addition of Clear Channel Capability to an existing service), or if the change involves changing the type of signaling on a Voice Grade service, and for all other changes the Access Order Charge as set forth in 17.4.1 following will apply.
- When the Clear Channel Capability optional feature is installed on an existing facility, the addition will be treated as a discontinuance and start of service and all associated nonrecurring charges will apply.

7.7 Program Audio Service

Program Audio Service is not currently offered by The Telephone Company.

7.12 Internet Service to K-12 Schools

The Internet is a public service offering which provides access to a network of computers. Rates, as set forth in 17.3.11 following, will apply to one 56 kbps Digital Data Service circuit per local calling area for connection to the Internet. These connections, provided as a public service to K-12 schools in the State of Nebraska, may be used for educational access to the Internet to the nearest Educational Service Unit (ESU) or frame relay point. Schools may not allow Internet access to third parties, other than teachers, administrators, or students, through this service.

7.13 Other High Speed Access to Internet Service for Schools

Charges for 64 kbps Digital Data Services and High Capacity Services will be discounted when sold to the State of Nebraska, any Nebraska Public School District, any Educational Service Unit or any accredited Nebraska Post Secondary School for provision of access to the Internet. Discounts will be determined on an individual case basis. This service is subject to the same restrictions as set forth in 7.12 above for 56 kbps service.
